Victor S. Arias González

Senior Java Software Engineer
Heredia, Costa Rica · Remote roles only
vicar176@gmail.com · +506 8517 4202 · www.linkedin.com/in/victor-arias-sr-java/

PROFESSIONAL SUMMARY

Senior Software Engineer with 14+ years of experience building Java and Spring applications, REST APIs, microservices, and React interfaces. Combines backend engineering, asynchronous messaging, SQL, testing, and technical leadership with AI-assisted development using OpenAI Codex, GitHub Copilot, and Claude Code. Recent work includes internal MCP server and tool development, reusable AI agent skills, and Spec-Driven Development, with attention to security, code quality, and maintainability.

TECHNICAL SKILLS

Backend Engineering
Java (Core, 7, 8, 17), Spring (Boot, MVC, Data, Security, Cloud), Hibernate, Python, JDBC, JPA, JUnit, Mockito

Databases
MySQL, PostgreSQL, MSSQL, Sybase, MongoDB, Couchbase, Stored Procedures, SQL Data Cleanup

Software Architecture & Integrations
Microservices, REST Services, JWT, OAuth 2.0, Keycloak, Maven, Git, SVN, Modular Monoliths, Firebase Authentication, Gradle

Cloud & DevOps
AWS (S3, EC2, SQS, CloudFront), Docker, Kubernetes, Jenkins, TeamCity

AI Engineering & Agentic Development
AI Agent Skills, Agentic AI Workflows, AI-Assisted Software Development, AI-Assisted Code Review, OpenAI Codex, GitHub Copilot, Claude Code, Spec-Driven Development, Root Cause Analysis

MCP & AI Agent Integrations
Model Context Protocol (MCP), MCP Server Development, MCP Tool Development

Messaging & Asynchronous Systems
RabbitMQ, Asynchronous Messaging, Message Producers / Consumers, Dead-Letter Queues (DLQ), Message Routing, Parking Lot Queues (PLQ), Apache Kafka

Frontend & Other Technologies
ReactJS, Typescript, NextJS, Javascript, Karma, Enzyme

PROFESSIONAL EXPERIENCE

Software Engineer
QAT Global · Costa Rica — OCT 2024 – Present

- Contributed to an internal Model Context Protocol (MCP) server and developed custom MCP tools, applying software engineering best practices and security considerations.
- Used GitHub Copilot and OpenAI Codex for implementation, debugging, refactoring, and AI-assisted code reviews; created reusable agent skills for root cause analysis, minimal-impact fixes, and pull request preparation.
- Applied Spec-Driven Development to define requirements and implementation specifications for AI-assisted engineering workflows.
- Developed and maintained Java 17 and Spring REST APIs and React features; migrated class components to functional components and implemented Java and React unit tests using JUnit, Mockito, Karma, and Enzyme.
- Developed and optimized stored procedures for MySQL and MSSQL; worked with Agile practices, Docker, Kubernetes, and TeamCity for CI/CD.

Technologies Java 17 · Spring · React · Karma · Enzyme · MySQL · MSSQL · Docker · Kubernetes · TeamCity · MCP · OpenAI Codex · GitHub Copilot · JUnit · Mockito · Agent Skills · Spec-Driven Development

Software Engineer
Sparq · Costa Rica MAR 2026 – OCT 2026

- Designed, developed, and maintained Java microservices, contributing to backend architecture and technical development decisions.
- Configured RabbitMQ producers, consumers, dead-letter queues (DLQ), and parking lot queues (PLQ) in Java for asynchronous processing and message failure handling.
- Provided technical leadership and guidance to one software engineer; defined requirements, broke down tasks, and created development tickets.
- Used Claude Code across implementation, debugging, architectural analysis, and planning, and created custom skills to standardize development workflows.
- Developed SQL scripts to identify and clean up duplicate records and restore data consistency.

Technologies Java · Microservices · RabbitMQ · DLQ / PLQ · SQL · Claude Code · Custom Skills · Technical Leadership

Independent Software Engineer
Self-employed · Remote APR 2023 – OCT 2024

- Independently designed and developed a personal full-stack product that was not launched, evaluating architectural patterns and technology choices.
- Built backend functionality with Java 17, Spring Boot, MVC, Data, Security, Cloud, Hibernate, and MySQL; transitioned from microservices to a modular monolith to simplify the architecture.
- Evaluated OAuth 2.0, Keycloak, and Firebase Authentication for authentication and authorization; explored Apache Kafka for asynchronous messaging.
- Developed React and Next.js interfaces integrated with REST APIs, evaluated S3-compatible object storage, and wrote Python scripts for development automation and technical experimentation.
- Managed architecture, implementation, and troubleshooting independently, using Maven, Gradle, Docker, and Tailwind CSS.

Technologies Java 17 · Spring Boot / MVC / Data / Security / Cloud · Hibernate · MySQL · OAuth 2.0 · Keycloak · Firebase Authentication · React · Next.js · Kafka (exploratory) · S3 · Python · Maven · Gradle · Docker · Tailwind CSS

Senior Java Software Engineer
Gorilla Logic · Costa Rica JAN 2018 – MAR 2023

- Provided comprehensive application maintenance and support, resolving software errors and adding new features to meet evolving client expectations and performance requirements.
- Contributed to a high-volume application using Java 7/8, Spring Boot, Spring Data, Spring MVC, and Sybase with Kafka integration.

Technologies Java 7/8 · Spring Boot · Spring Data · Spring MVC · Sybase · Kafka

Senior Java Software Engineer
Microfocus · Costa Rica MAR 2017 – DEC 2017

- Designed and developed new features based on Java Core, utilizing native JDBC for data access across PostgreSQL and MySQL databases.
- Collaborated with the QA team to ensure high-quality development and assisted in the onboarding and mentorship of new team members.

Technologies Java · JDBC · PostgreSQL · MySQL

Senior Java Developer
Informatech · Costa Rica SEP 2015 – MAR 2017

- Participated in the architecture and design of a new Microservices-based system deployed over AWS (S3, SQS, EC2).
- Developed and supported the existing software while building new REST APIs using Java 7/8, Spring Boot, Spring MVC, and Couchbase DB.

Technologies Java 7/8 · Spring Boot · Spring MVC · Couchbase · AWS

Java Developer

Prodigious LatinAmerica · Costa Rica MAY 2013 – AUG 2015

- Developed REST APIs and participated in a project migration from .Net to Java.
- Managed code merges and production releases, participating actively in all AGILE ceremonies (stand-ups, sprint planning, retrospectives).

Technologies Java · REST · .NET migration

Junior Java Developer

Rivet Logic · Costa Rica APR 2012 – MAY 2013

- Developed and maintained Liferay components, including portlets and hooks, across Community and Enterprise versions, utilizing Java 7 and Maven.

Technologies Java 7 · Liferay · Maven

EDUCATION

National University of Costa Rica — BS. in Computer System Engineer

CERTIFICATIONS

Oracle Certified Associate (OCA)

LANGUAGES

Spanish (native), English (professional)
